

A Budding Exporter of Sesame Seed

Pro Import Export, Sudan

Mr Muhanad Awad Mahmoud Siddig
General Manager, Pro Import Export -Sudan

About Our Company

Our company was established in 2012, and ever since our first day of business, it has been our goal to focus on quality rather than quantity in our products and business relationships.

We are PRO for Export – Sudan, one of the leading exporters of Sudan Origin commodities, including white and red sesame,

peanuts, chickpeas, and pigeon peas.

About Sudan's Sesame Crop Size

Production is anticipated to be less than the last year because there is a considerable number of farmers have planted cotton instead of sesame, plus some areas were affected by the floods.

Criteria for Sourcing Sesame

We purchase from the sesame stock area in the main markets.

Quantum (Volume) of Exports and Key Export Destinations

We export 15,000-20,000 tons annually (Two-third whitish and one-third reddish). We mainly export to China, India, Indonesia, Tunisia, Turkey and UAE.

About the quality and purity of the sesame

We have a quality control department approving the quality when we purchase sesame from the markets.

Impact of Currency Fluctuations and Geo-political Scenario on Sesame

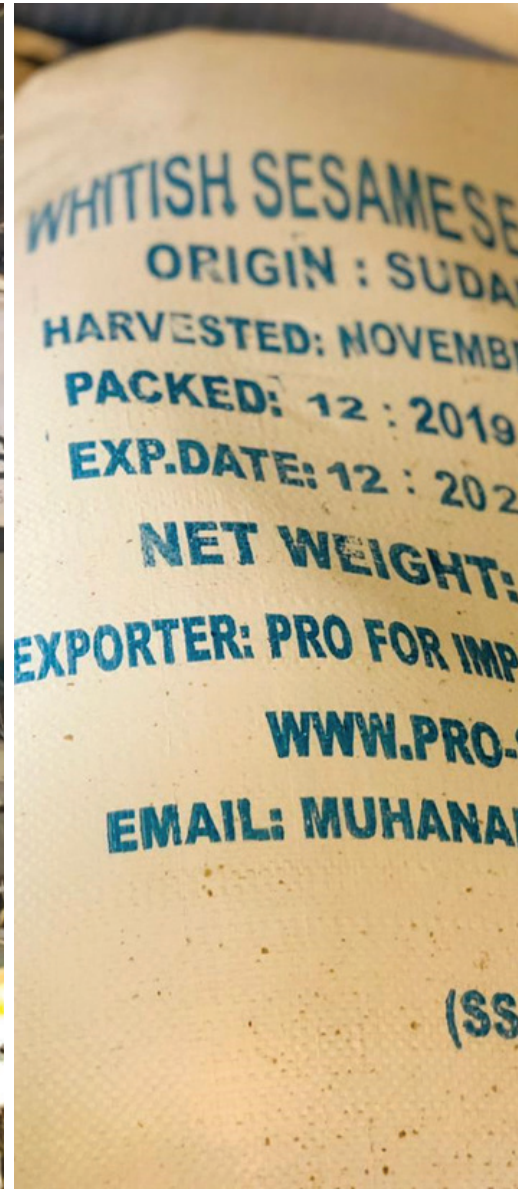

Of course, this is one of the significant factors in the export process, it has a direct impact on the profit and loss. But we are still trying to keep our simple of zero default.

Port situation, Availability of Containers and Other Logistic Challenges in Sudan

It's good now, except for the strikes which we face sometimes.

Achievements

The best quality award is given to our company at the China import commodities conference 2019.

Health Benefits

For Healthy Skin

The high zinc content helps produce collagen, giving skin more elasticity and helping repair damaged body tissues. Regular use of sesame oil can reduce skin cancer. Learn more about Sesame Benefits For Your Skin.
